** As of HS19 the acceptance of the MA Thesis is no longer a precondition for the completion of the MA exams. As a result, registration for the MA Exams is no longer directly linked to registration for the MA thesis. Regarding registration for the study course, there is now a separate form available for the MA exam registration (not regarding the combination of two study courses). To finish the study course in both a sensible order and in a time span of four semesters, it is recommended that students write the MA thesis before registering for the MA exams. **In case of any contradictions to this sample study plan, the order of the Philosophisch-Historischen Fakultät for the master's course or the study plan and study guide of the study course 'Sprache und Kommunikation' applies.**
